Objective

I'm a Jr. MERN Stack Developer and student at IUBAT-CSE, actively seeking remote jobs to contribute and grow. With a passion for coding, I aspire to advance to a senior position, demonstrating my energy to continuous improvement and excellence in the field

Skills

Frontend	Backend	Database	Tools
• JavaScript	• Express JS	• MongoDB	• Git
• React	• Node JS	• Mongoose	• Vercel
• Tailwind	• JWT		• VS Code
• CSS	• Firebase		• Figma
• HTML			

Projects

1. University Meal Management System (Meal Master)

This MERN stack project is a package system for properly managing the meal for the students of an university. Stripe payment gateway, Admin authorization and user-wise reviewing facility makes this project out of the box.

- Real-time chat with Admin   (Project Duration - 13 Days)
- Liking and commenting feature user wise
- Stripe payment gateway

Repository of Client Side   Repository of Server Side   Live Site

2. Job Posting & Finding Portal (Job Nest)

Job Nest is a three layered authorization based job searching & posting portal where host can add a job and user can apply for them. Also, general user can send request to be the Host.

- Three layer of authorization - (Admin, Host, General)   (Project Duration - 10 Days)
- Host can modify his posted job
- Self created or outdated job can't be applied
